

Deutsche Bunsen-Gesellschaft für Physikalische Chemie
awards the

Nernst-Haber-Bodenstein Prize 2009

in memory of Max Bodenstein, Fritz Haber and Walter Nernst. The prize will be presented at the 108th Annual General Meeting of the German Bunsen-Society from 21-23 May 2009 in Cologne.

The prize will be awarded to a distinguished younger scientist (of up to 40 years of age) for outstanding scientific achievements in the field of physical chemistry. Suitable candidates of international visibility in their research field will be evaluated by a high level expert selection panel with respect to the scientific quality, originality and independence of their research. Candidates should come from a German-speaking region of Europe or work there at the time of their nomination.

Nominations from established scientists in the area of physical chemistry should include a short CV of the candidate, an overview of the candidate's scientific achievements and publications, and a supporting statement.

Nominations should be submitted by **1 October 2008** to
